RE : TESTIMONIAL FOR EASY BATH

With reference to the above

2. Our Hospital has been Using Easy Bath manufactures by Swethas Pvt.Ltd and found Chlorhexidine Gluconate Impregnated wet wipes to work more effectively than traditional sponge bathing or other kinds of non-medicated wet wipes. This product also has Allantoin which is an added advantage to moisture the skin.

3. We recommend this product for effective infection control of infection from all kind of bacteria and viruses. We support the use of Easy Bath for skin/body cleansing for all patients who are immobile and unable to take showers.

Thank You.

With regards,

.....
DR KHALID BIN IBRAHIM
